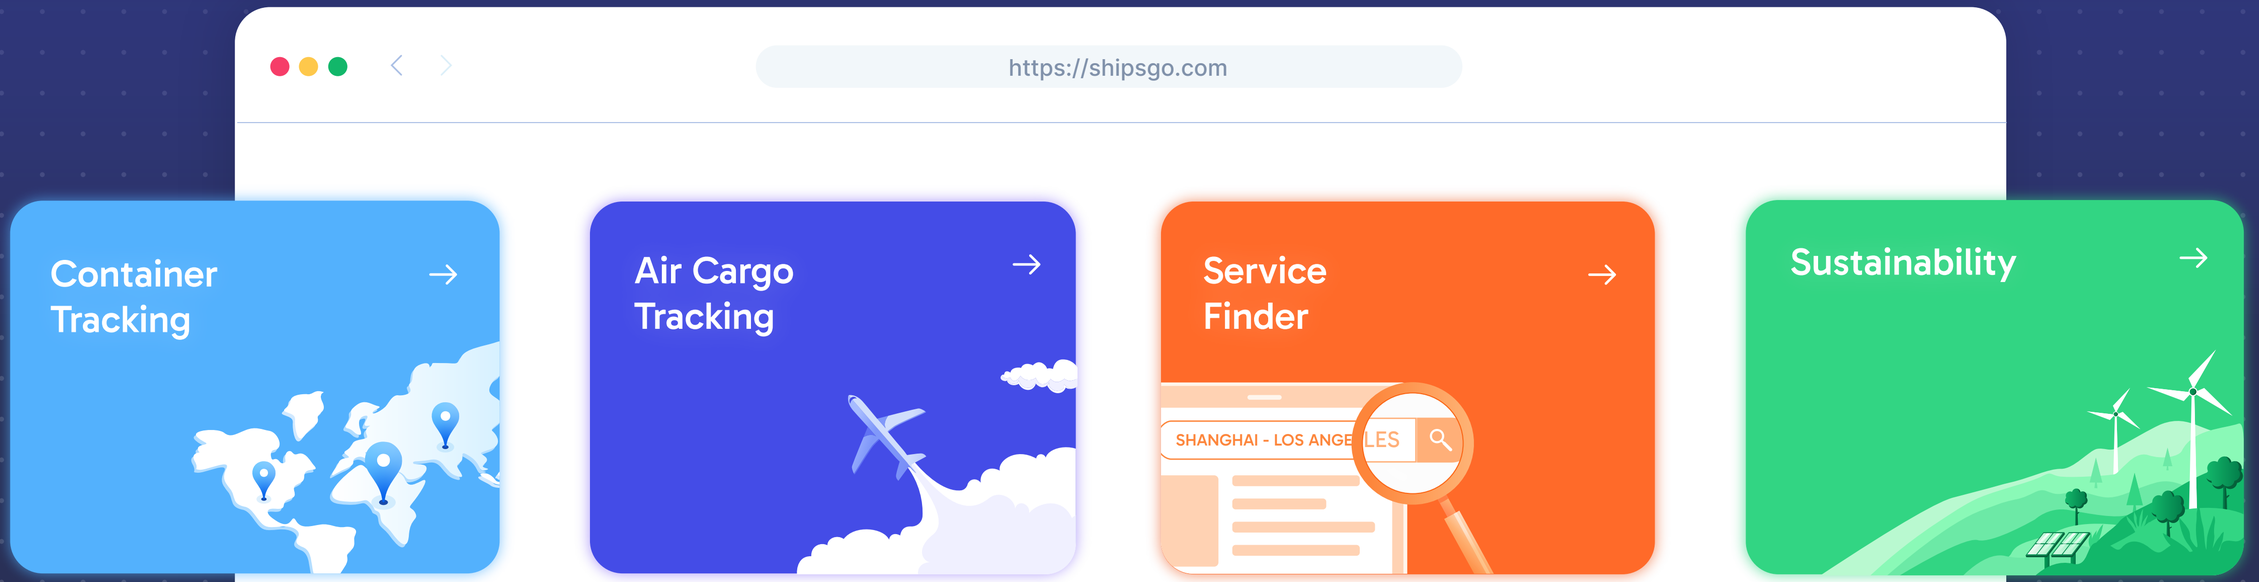
PRODUCTS

Container Tracking and Shipment Visibility Platform

Shipsgo offers a wide range of products, including Container Tracking and Air Cargo Tracking, that empower shippers and logistics service providers to enhance their supply chain visibility.

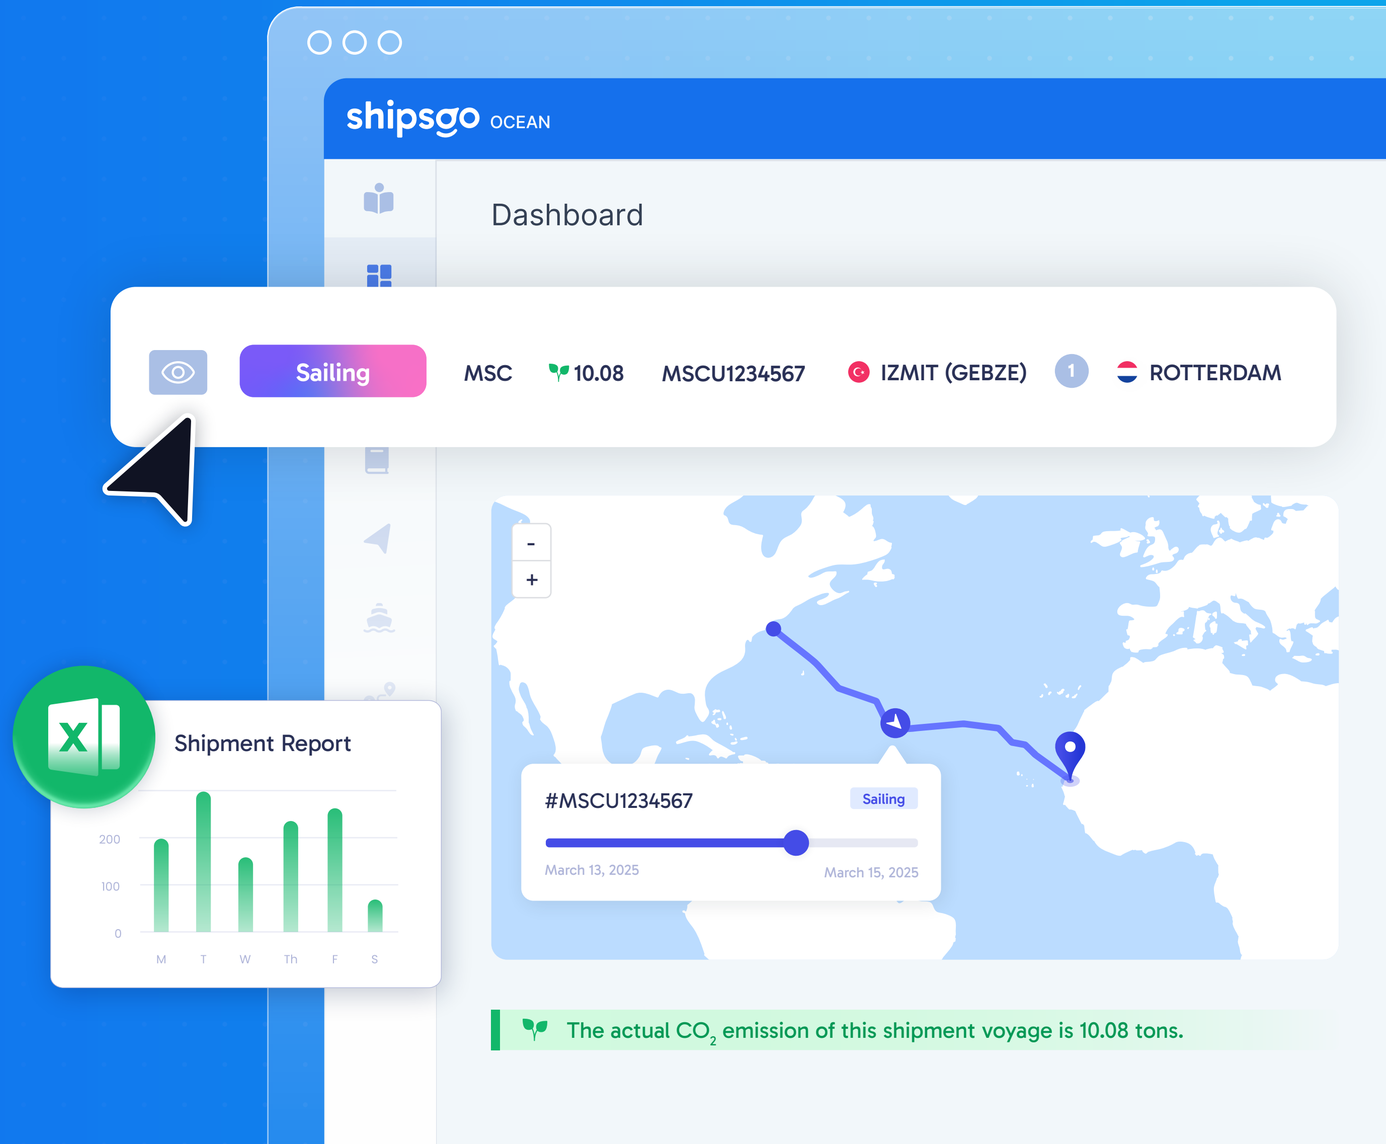


PRODUCTS

Real-Time Container Tracking

- Receive voyage summaries of your shipments.
- Tracking with Container, MBL, or Booking number via Excel upload or API integration.

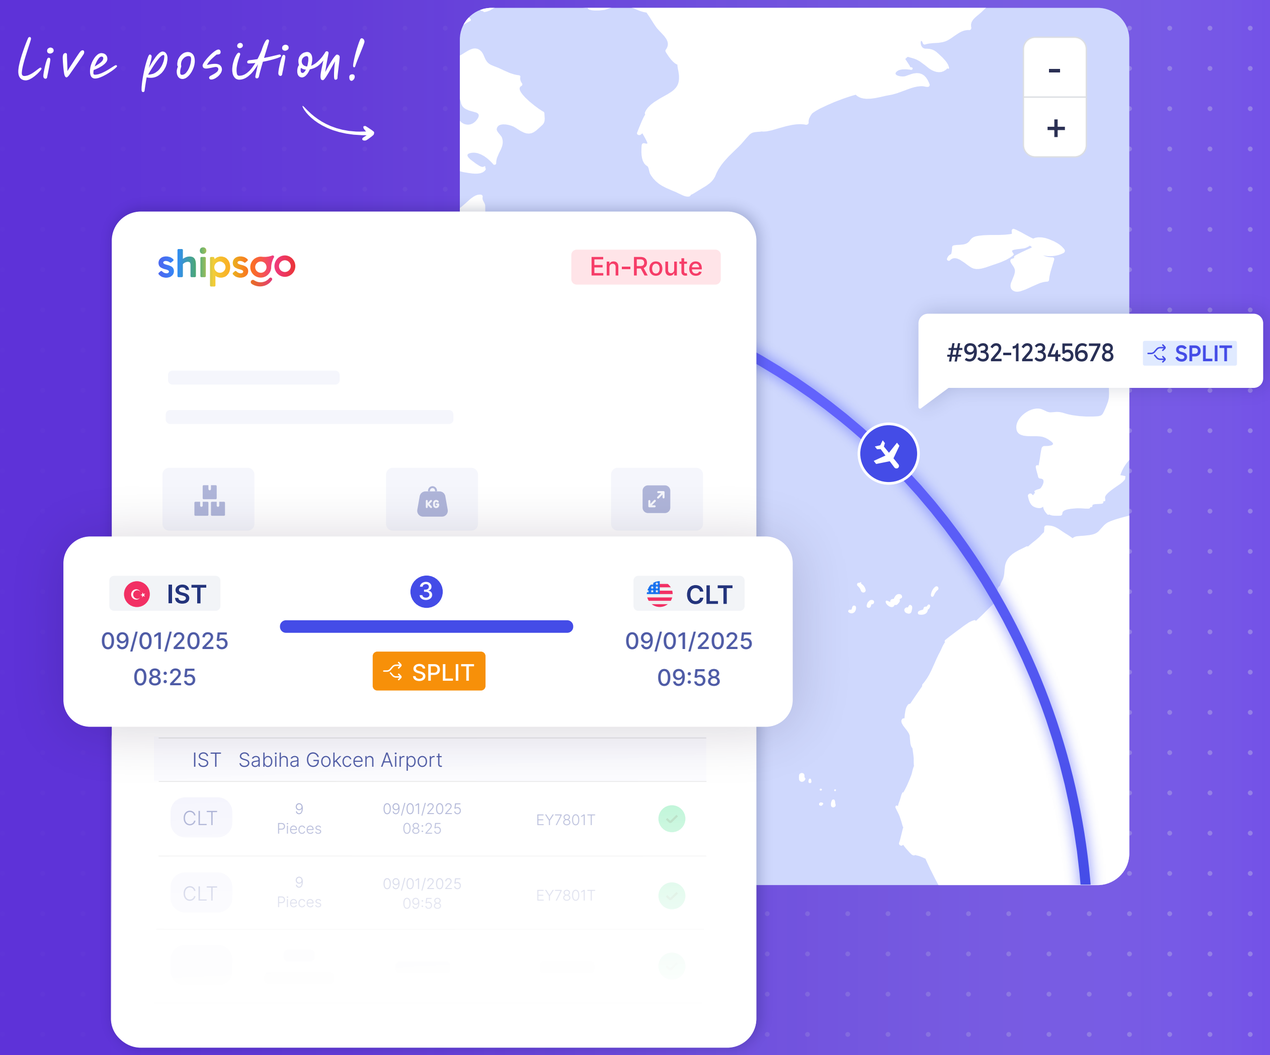
Branded Notifications: Customize all tracking notifications with your logo and company branding, ensuring customers see notifications as coming directly from you.



PRODUCTS

Air Cargo Tracking

- Access air cargo status in real-time for more informed decision-making and optimized supply chain process.



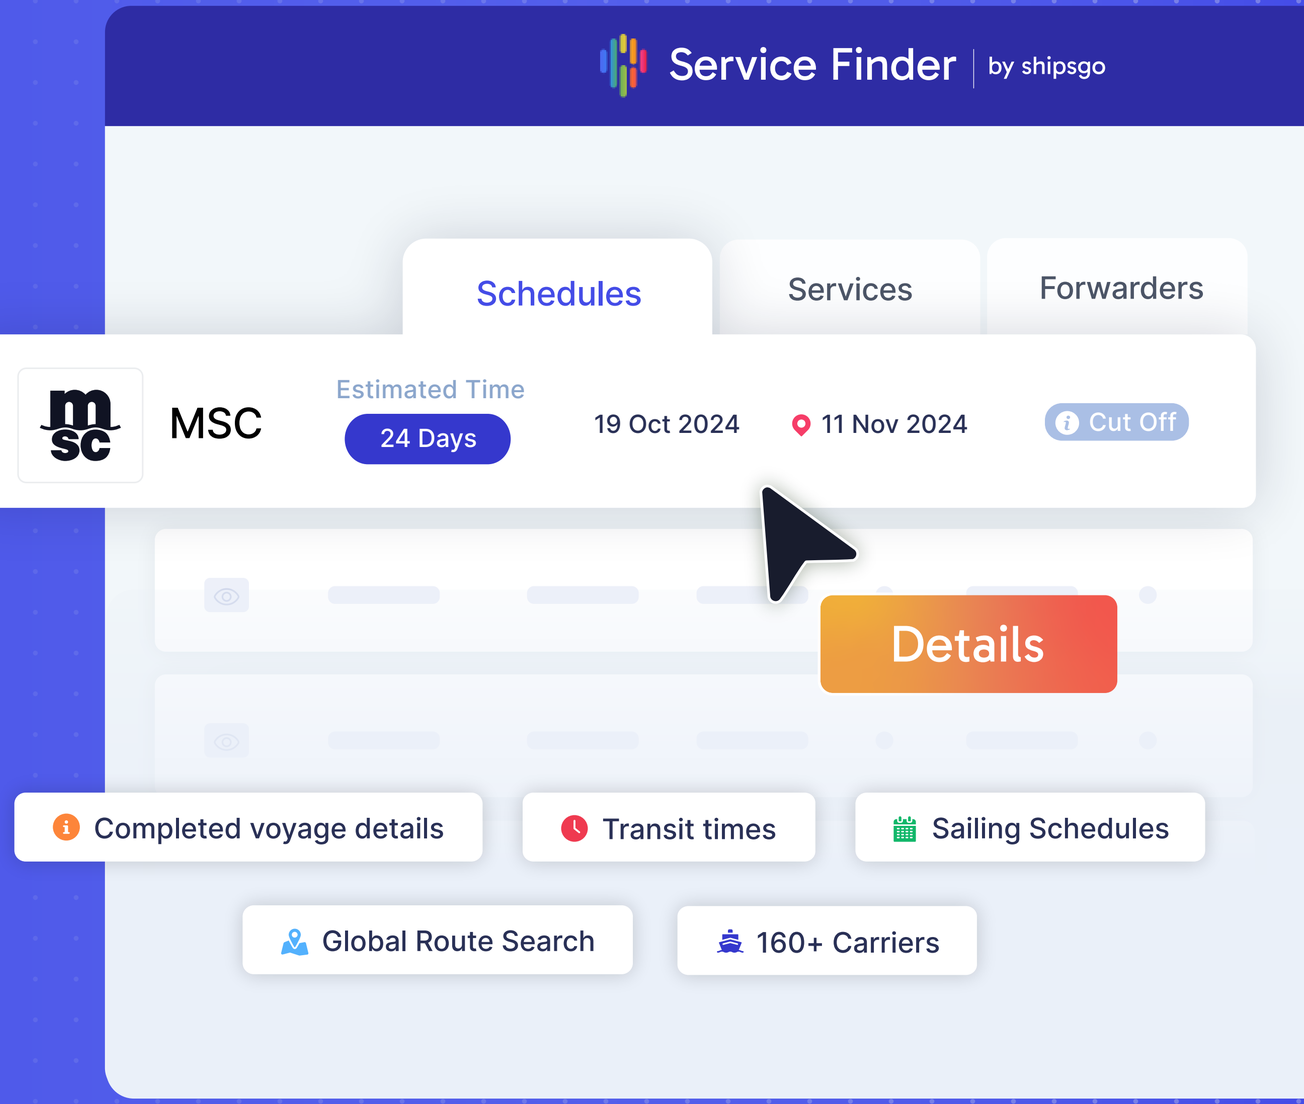
White Label Live Map Integration: Seamlessly integrate our Live Map for Air Cargo and Container Tracking into your website as a white label product.

PRODUCTS

Shipping Service Finder

- Organize your next shipments by finding the best shipping service provider for you or contacting popular freight forwarders that provide service for your routes.
- Discover the shortest transit time for your route and transshipment details based on actual data.

Free Listing: Get your company listed on our Freight Forwarder lists at no cost, increase your visibility to potential customers searching for logistics providers on Service Finder.



PRODUCTS

Carbon Offset

- Shipsgo offers you a great opportunity to make a real environmental contribution with the Carbon Offset Service.
- You can fund validated offset projects through your Shipsgo dashboard.

Supporting Carbon Offset: We calculate your shipment's CO_2 emissions and offer various offsetting programs that align with your business goals and environmental values.

PRODUCTS

Port Area Carbon Emission Tracker

- Shipsgo Carbon Emission Tracker is a digital platform to track the real time carbon emissions (Scope 1-Scope 3) of each port area in the world. The platform, in addition to that, allows users to compare historical changes in carbon emissions and to explore the sources of emissions.

Supporting Port Area Emission Tracker: Calculations can be tailored to your specific needs — including vessel type, multiple ports, cargo type, and more. The methodology is approved by the GLEC Framework.
